Statement

MCT
EQUIPMENT

MCT Equipment is the leading provider of alternative lifting equipment for the mining and construction markets.

Providing top quality products for optimal performance through exceptional wide-ranging service.

At MCT Equipment, ‘Think different, lift different’ is ingrained in everything that we do. Born out of the necessity felt in the market for a supplier that could build genuine, predictable relationships with clients and suppliers; MCT has determinedly brought a solution.

With a pursuit of world-class forward thinking, MCT Equipment supply and maintain both new and used mobile cranes, telehandlers, and associated lifting products. Across construction, mining, infrastructure and marine lifting settings, MCT Equipment is the natural partner where your focus is innovation, safety and efficiency.

MCT Equipment is a dedicated family business, headed by Anthony and James Grosser, securing a legacy of high-quality service for generations to come. Coupled with over 30 years of combined experience across the construction, mining, infrastructure, and automotive industries, our commitment to service makes us a force to be reckoned with.

Not only offering support and service of widely popular brands such as Terex and Shuttlelift, MCT are the exclusive distributors for world-leading telescopic handling brand Magni, JMG Cranes and Cimolai Technology.

Based in Henderson, WA, MCT Equipment's support network extends across Western Australia and the Northern Territory. This reach ensures the highest levels of customer service whilst enabling rapid project mobilisation with quick turnarounds and minimal downtime.

Snapshot

Offerings

- New & Used Equipment sales
- Mobile Crane and lifting equipment repairs
- Dedicated spare parts support service
- Machine refurbishments
- Full field service capacities
- Structural Repairs
- Major inspection certifications (10 and 25 years)
- Electrical and air-conditioning repairs and maintenance
- Classified plant compliance requirements

Equipment Serviced

- Rotary Telehandlers
- Heavy-Duty Telehandlers
- Fixed Telehandlers
- Pick & Carry Cranes
- All Terrain Cranes
- Rough Terrain Cranes
- Truck Mounted Cranes
- Crawler Cranes
- Mobile Gantry Cranes
- Boat Hoists

Why MCT?

- Steadfast commitment providing top quality products to the mining and construction markets.
- Enviably able to ensure optimal performance through exceptional, wide-ranging service.
- Staunch pursuit of innovation for affordable efficiency for our clients
- OEM approved product support with only genuine products to maintain compliance and safety.
- Factory-trained service technicians to support operating telehandlers, cranes and lifting equipment from Magni, JMG Cranes and Cimolai Technology.
- Broad-reaching support network across WA and NT to reduce down time and associated opportunity costs for regional clients.
- Sourcing and disposal of quality used equipment throughout Australia.
- Comprehensive range of inspection, testing, repairs and programmed maintenance services specifically tailored to suit your business needs.
- Competitive pricing on equipment, parts and servicing.
- Unwavering dedication to exceptional customer service throughout our partnerships.

Think different lift different

The requirement to be ahead of rather than merely meeting the uniquely broad-ranging requirements seen in WA & NT has led to MCT Equipment partnering with Italian powerhouse in the telehandling game - Magni.

Telescopic Handlers

Safe, strong and reliable our fixed telehandler range combines craftsmanship with innovation and technology to aim for high-end performance in each application, choose the right Magni for your needs.

The telehandler range is flexible and adapts to your needs: from industry to construction and mining sectors, Magni models are perfect for every application.

Rotary Telehandlers

The rotary telehandlers are extremely versatile and flexible machines. They are used for many applications being able to equip various accessories such as hooks, forks, winches and platforms and being equipped with 360 ° rotation.

All Magni lifts work in complete safety, thanks to the patented load control system that detects the risks of overload during use and inhibits further aggravating movements. Reliability and functionality found their embodiments in these 3-in-1 machines.

Heavy Telehandlers

Magni's heavy-duty telescopic handlers have a payload of between 10 and 50 tonnes and are ideal for heavy-duty tasks in manufacturing, ports and mining. They guarantee maneuvering speed and excellent stability.

They have been designed specifically to take on such onerous tasks and so make the ideal companion for those requiring performance and reliability in extreme conditions. They are undisputed champions in heavy-duty work.

Platforms

The Magni platform range offers a wide range of products, whether your requirements are simply to reach your desired height or on the more complex side such as working in a tunnel, removing asbestos at heights, or operating in under bridge areas. MCT can find your perfect solution to suit your exact needs.

Lifting

The ability to effortlessly lift and move objects, no matter the size, is imperative to peak performance. MCT relies on Magni's range of hooks, jibs and winches for a full range of compact sturdy lifting accessories.

Other

Our Magni attachment range addresses a variety of requirements, understanding that every operation functions differently. From simple fork carriers for easy transportation, to bucket access for easy disposal and recycling needs, work with the MCT team to devise your solution.

Think different lift different

MCT Equipment proudly holds the Australian distribution rights for JMG Cranes, an innovative Italian manufacturer challenging traditional lifting solutions with their electric, battery-operated pick-and-carry cranes.

8h Non-Stop Working Hours 0 Emissions 25 Fields of Applications

Radio Remote Controlled

The range of radio remote controlled cranes is designed to perform optimal manoeuvres in narrow spaces. Through the use of the radio-remote control the operator can perform all movements in total safety.

Cabinate Cabin Cruise

The "Cabin-Cruise" range meets the needs of those who want to control the machine directly without giving up the possibility of remote controlling through radio-remote control.

Lige Cabin Cruise

The "Lige" range is made up of electric battery-operated pick & carry cranes, designed to guarantee agile and precise performances even in narrow spaces.

Carry Deck Cranes

The "Carry Deck" range designed to meet the need of agility and control even in narrow spaces. Their articulated telescopic boom makes them ideal for carrying out industrial maintenance.

Telescopic Forklift

Compact and easy to handle, the telescopic forklift is designed to integrate the 8 ton hydraulic fork and the 12 ton max capacity. Complete with radio remote control, it is the ideal machine for precise lifting of underground or vertical loads.

Lifter Cranes

The lifter range features an innovative steering system that guarantees agility, precision and simultaneous movements. Extremely compact and easy to manoeuvre, they are fully dismountable and therefore easy to be transported.

As the Australian supplier of Cimolai Technology equipment, which showcases an extensive selection of cranes and gantries, we have the expertise to fulfill your various requirements for a wide range of heavy machinery solutions for large-scale construction projects and production lines.

Rubber Tyre/ Rail Gantry Cranes – Various Configurations

Featuring suspended beams, these are extensively used in large-scale construction projects. They are employed for handling existing beams or for the precise placement of new beams in in-situ construction. These gantries ensure safe and accurate lifting.

Flat Bed Trolleys

Built for convenience, the flatbed trolleys are primarily used for transporting steel and concrete beams from one location to another. They provide a reliable and efficient solution for transporting heavy materials within and between construction sites.

Self-Propelled Transporter

Specifically designed for handling and transporting precast or reinforced blocks and beams, offering flexibility and manoeuvrability, enabling efficient movement of heavy materials within construction sites.

Specialties

Buy New

Through MCT Equipment, Magni, JMG Cranes and Cimolai Technology® range of innovative equipment options available to the mining and construction markets have significantly expanded our breadth of capability.

With a selection of our machines available to be inspected in our Henderson headquarters, our full range is able to be delivered swiftly to your operation.

Used Equipment

MCT Equipment provides reconditioned and second-hand cranes, telehandlers and lifting equipment to clients across the country.

Sale of high-quality used equipment

MCT will source your required equipment through our international network of trusted partners, handling all stages of the process to deliver a high quality machine ready for use. From training and handovers, to repairs and modifications - our team of dedicated staff works together to ensure you receive the equipment you need with minimal downtime.

Disposal of your existing asset

Before we commence the job, our team provides a structured disposal plan to secure full visibility of the process from start to finish. High value machines need high value team members, and at MCT we trust that over 10 years experience in the used crane market fits the bill.

Refurbishment of tired machinery

MCT Equipment provides high quality refurbished equipment with full warranty in constant circulation. At MCT, we understand the importance of providing a cost effective and time effective solution to our clients which is why our refurbished units are serviced to the highest standards with compliance and quality at the forefront every time.

Workshop Servicing

At MCT, you can trust in our philosophy that the work doesn't stop when the equipment leaves the workshop. Our team understands the importance of protecting your investment, giving you peace of mind that your equipment matters to us as much on day 200 as it does on day 0.

We believe that our promise is your guarantee, doing our part to minimise downtime and disruption with around the clock support, so you can get on with the important business of running your business.

From servicing support and training, to critical failures and general advice from our team of seasoned professionals, our workshop is the best of the best.

Major Rebuilds and Support Division

At MCT we're not here trying to woo spiders. Our inspections are not about ticking boxes. With our structured methodology we look at getting you the best outcome for your organisation and your equipment, as well as ensuring maximum safety, productivity and machine longevity.

Prior to a major inspection, we assess the machine's service and repairs history, the consideration for machine usage and the overall condition of the machine. As part of the pre-inspection and prior to preparing a scope of work, we complete full operational tests and report on this, as well as complete a full machine inspection with an additional report. The final step is utilising a 3rd party engineer or inspector to go over those findings and reports.

MCT inspects the following:

- Boom
- Chassis
- Winch/Hooks
- Hydraulics/Steering
- Brakes/Wheels/Driveline
- Replace fuel lines
- Inspect all electrical harnesses and connections
- Ensure all lights are operational and correct
- Ensure all factory updates and recalls completed
- Complete LMI inspection and calibration certification
- Ensure all decals are fitted and correct
- Operational test and final completion

Industries

Mining

Reliability in Extreme Conditions

MCT drew its beginnings from the mining region of the goldfields in 2001, later moving to Perth for further development. Through ample experience, MCT understands the intense requirements to support the industry and the demands for innovative, sustainable solutions that reduce downtime, increase safety and improve site productivity.

At MCT, we have a deep supplier network that enables us to turn around machine refurbishing faster, more efficiently to get you back onsite faster.

Construction

Flexibility for Complex Environments

With the high demands of the modern construction industry, it is imperative to understand the intense constraints and time pressure in order to provide construction businesses suitable solutions.

At MCT, we understand that equipment failures and poor support have a flow on impact on your project. MCT offers innovative solutions with high-performing equipment and a high-performing team, dedicated to minimising pressure so you can focus on the job at hand.

Marine

Safety at Depth

At MCT we conduct a variety of services within the marine industry, such as boat storage and cargo handling as well as services and repairs. As a leader in the industry we're always looking for eco-friendly and sustainable solutions, while also keeping safety a priority. Products such as Magni was developed to handle the harshest of environments making them ideal for the challenging marine environments.

Agriculture

Complete Versatility

Versatility is the priority for these applications to ensure flexibility to use multi-purpose equipment in rapid succession. MCT Equipment provides telehandlers that feature compact designs and a wide range of attachments to deliver on demand for versatile equipment.

Renewables

Eco-friendly Solutions

We strive towards sustainability at MCT, looking to lessen our footprint wherever possible - whether it be renewable energy options, developing more productive work practices, or more efficient machinery. As leaders in the lifting industry, we are constantly looking towards cutting edge technology in this space.
